

Cordyline "Electric Pink"

Did you know this Banksii Variety is **COMPACT** and **CLUMP FORMING** growing to only 1.2m high

full sun

drought tolerant

1m

1.2m

FEATURES

- Dramatic and colourful perennial plant
- Outstanding performance in harsh conditions withstanding temperatures in excess of 40c
- Electric Pink is a compact, clump forming Cordyline that doesn't develop a bare single stemmed trunk. Instead it develops side shoots that together with its slightly arching leaves provides a denser foliage plant
- Grows to 1.2 m in height
- Year round colour, particularly in winter

USES

- An amazing eye catching variety for outdoor gardens or feature in large patio pots
- Vivid pink, vertical leaves make an extraordinary statement against green or yellow dominant backgrounds
- As a focal plant in patio containers
- Great effects in Mediterranean, tropical and formal styled gardens. They contrast superbly with shaped hedges, conjuring a relaxed and stylish look

POSITION

Full sun to light shade in heavy loam to light sandy soil

CARE

Apply a controlled release fertiliser when planting. Water adequately to establish. Once established, it is extremely heat tolerant and cold hardy. Below 0 degrees the foliage will die back with regrowth from the stem base dependant on the amount of protection provided to the roots, and the age of the plant.
