

Cupressus "Lemon Scent"

full sun

frost
hardy

coastal

3m

FEATURES

- Fast growing evergreen tree
- Beautiful yellow foliage emits a fresh citrus aroma when crushed or cut
- A natural repellent against mosquitoes
- 3m high x 1m wide
- Hardy and drought tolerant

USES

- Makes an ideal specimen for any patio tubs or garden
- Suited to container growing but can also be planted directly into a garden bed

POSITION

When planting your tree, ensure the soil PH level is correct, 6 is ideal. Lemon Scent suits a variety of climates, from coastal conditions to frost prone areas.

CARE

Stake to support the tree while settling in. Keep moist at all times, particularly in the growing season. A slow release granule fertilizer should be applied on a monthly basis. Does not like competition around it.
